**As Riviera Hotels, we use our energy efficiently and set targets to reduce energy consumption in order to protect our planet from potential dangers.**

To achieve this:

- We follow national and international standards, laws, and regulations to fulfill both our responsibilities to nature and our legal obligations. We voluntarily carry out initiatives to reduce energy use and/or continuously improve our energy consumption performance, and we monitor the outcomes of these efforts.
- We set goals and include energy efficiency topics in our training programs to ensure employee participation.
- We value cooperation with all our stakeholders to create shared goals and results in energy management. We strive to maintain interaction with our guests, employees, visitors, and all business partners to raise overall awareness and consciousness.
- We research, procure, and use energy-efficient products, equipment, devices, and technology alternatives.
- We aim to document our Energy Management System, disseminate it across all departments, update and review it as needed, and ensure its continuous improvement.
- We assess potential energy risks or emergencies such as energy shortages and plan the necessary preventive measures.

Vice Chairman of the Board  
İBRAHİM SİPAHİOĞLU
